# Scoring and Reflecting on OKRs Templates

# Scoring Your OKRs

*This exercise will help evaluate how your results stack up against your intent.*

- OKRs matter most when they're measured — not just set.
- If you set Committed OKRs, aim to meet 100% of your targets.
- If you set Aspirational OKRs, aim for 100%, but an average of 70% signals strong progress.

# Think in Stop Lights

*Use colors to show progress at-a-glance:*
*Red (0–30%) = off track, Yellow (40–60%) = moving forward,*
*Green (70–100%) = success*

| | |
|---|---|
| **RED** | Failed to make significant progress |
| **YELLOW** | Made progress, but did not complete |
| **GREEN** | Result delivered |

# Alternate Scoring Views

You can use your OKR Overview Spreadsheet or a table like the example below.

- Visualize OKR performance with progress bars, shaded cells, or color-coded scores for a quick, consistent snapshot of progress.
- Add a Discussions column to capture what the numbers don't show — insights, context, and next steps.

*Duplicate this table and edit your version*

| Objective | Key Result | Quarter Target | Quarter Actuals | Discussions |
|---|---|---|---|---|
| Become the #1 free mobile banking app for developing countries | Improve weekly sign-ups by 15% by July | 15% | 🟡 14% | Strong results, within 1 percentage point of goal |
| | Launch a marketing campaign in 12 languages by August | 12 | 🟢 12 | Launched three weeks early, so can take on more in the next quarter |
| | Improve NPS to 60 | 60 | 🔴 52 | Below target by 15% and lower than competitor average of 58 |
| | | | | |
| | | | | |

# Reflecting on Your OKRs

## *Use the following to determine next steps for each OKR in the new cycle.*

**1. Retire an OKR if….**

- It was achieved.
- The environment has changed, making it irrelevant.
- OKR is no longer under your control.

**2. Rewrite an OKR if…**

- The wrong priority was set.
- The OKR was too ambitious, too easy, or steered the team toward the wrong target.

**3. Roll over an OKR if…**

- The Objective wasn't met and remains a priority.

**4. Recraft an OKR if …**

- What outcome are you trying to achieve?
- What needs to be true for your team to deliver that outcome?

**5. Rethink an OKR if…**

- You set the bar too high
- You missed a key critical component
- You failed to track and act on data in time
- A Key Result was not something you could control
